1 Introduction

This CCTV Policy has been prepared for the use of CCTV at Ballinrobe Community School. The purpose of the Policy is to ensure that data subject's rights and freedoms are not overridden by the use of CCTV at the school.

2 Data Protection Policy

2.1 GDPR Awareness

The Data Protection Policy & the Data Privacy Impact Assessment should be referred to when consulting this document. Ballinrobe Community School will ensure that management and staff are aware of GDPR and are trained appropriately to their duties in respect of processing of personal data as per this data protection policy. The training and awareness programme will consist of:

- Briefing to all staff;
- A general email to all staff with the Data Protection Policy;

2.2 Balance of Rights

In using personal data for the operation of the school, we will ensure that we will only use a subject's data if the subject's rights do not outweigh our lawful basis in using that data.

The balance will be assessed by first checking that we have a lawful basis for using the data, and then evaluating whether disproportionate financial, reputational or social harm could be caused to the individual through our use of their data. We will achieve this on an ongoing basis via the Data Protection Policy and Record of Processing methods already explained in the Data Protection Policy.

2.3 Lawful Processing Criteria

Ballinrobe Community School processes personal data in the pursuance of several lawful processing criteria. In all cases we examine the balance of rights with respect to the use of personal data. It is our objective to align our activities with the rights of the data subject, such that our use of their data is beneficial to the data subject and that any inconvenience or risk to the data subject is minimal in comparison with the benefits there from. We have established our lawful processing criteria in the Data Map & Processing Activities outlined in the Data Protection Policy.

3 Responsible Person Contact Details

Below are the contact details of the person most qualified to respond to questions regarding this Privacy Impact Assessment.

Name: William Culkeen
Title: Principal
Address: C/o Ballinrobe Community School, Convent Road, Ballinrobe, Co. Mayo.
Telephone: (094) 9541777

4 GDPR Principles

4.1 Principle 1: Lawfulness, fairness and transparency

Ballinrobe Community School believes in operating our school fairly and ethically and this will extend to all personal data held for those purposes. Subjects will be informed when data is being collected, and at the same time informed what we will use that data for. We will ensure that appropriate technical and organisational measures are in place to secure that data.

Collection and processing of data will be transparent. Advisory notices and privacy statements relating to data rights will be published as appropriate in plain English and will be structured where relevant to improve accessibility of this information to data subjects. Persons will be clearly advised of their rights also.

4.2 Principle 2: Purpose Limitation

Personal data collected by Ballinrobe Community School will be processed only for the purpose for which it was collected. In the event that this purpose should change, data subjects will be informed within the 30-day regulatory period and consent sought for the change.

4.3 Principle 3: Data Minimisation

Ballinrobe Community School will collect only the minimum quantity of personal data to carry out a particular task. Where appropriate, potential data subjects will be requested not to provide unwanted or inappropriately sensitive personal information.

4.4 Principle 4: Data Accuracy

Ballinrobe Community School will make every effort to ensure that subjects' information is accurate and up to date. Ballinrobe Community School will endeavour to ensure via appropriate levels of staff training that it is transcribed accurately. If it is not possible for subjects to correct their data personally, data can be corrected by contacting Reception.

4.5 Principle 5: Storage Limitation

Ballinrobe Community School will store and retain personal data only while there is a valid and lawful basis to do so. Personal information will be deleted when it is no longer required for the purposes for which it was collected.

Where systems do not allow deletion of all records relating to an individual, records will be anonymised by replacing personal information fields with substituted generic text.

4.6 Principle 6: Integrity & Confidentiality

Personal Data shall be processed securely i.e. in a manner that ensures appropriate security of the Personal Data, including protection against unauthorised or unlawful processing, accidental loss, destruction or damage. Ballinrobe Community School will use appropriate technical and organisational measures to ensure the integrity and confidentiality of personal data is maintained at all times.

4.7 Principle 7: Accountability

Ballinrobe Community School is responsible for, and is able to demonstrate compliance with GDPR. This means Ballinrobe Community School will demonstrate that these Data Protection Principles (as outlined here) are met for all Personal Data for which it is responsible.

5 Data Protection Impact Assessment (DPIA)

Article 35.1 of the General Data Protection Regulations makes reference to the mandatory requirement for a Data Protection Impact Assessment (DPIA):

“Where a type of processing in particular using new technologies, and taking into account the nature, scope, context and purposes of the processing, is likely to result in a high risk to the rights and freedoms of natural persons, the controller shall, prior to the processing, carry out an assessment of the impact of the envisaged processing operations on the protection of personal data.”

CCTV systems are considered ‘high risk’ particularly in Article 35.1(c): “a systematic monitoring of a publicly accessible area on a large scale”

The appropriate time to carry out a CCTV Data Protection Impact Assessment (DPIA) is prior to the procurement of, or installation of the CCTV system or camera(s). Prior to the introduction of the GDPR, DPIA’s were discretionary, however from 25th May 2018, it will be mandatory to carry out a DPIA on all installations.

Readers should refer to the school’s DPIA where we have demonstrated:

- strong justification for the installation of the CCTV system/camera(s);
- consideration has been given to the privacy rights of the data subject with regard to the proposed location of the camera(s);
- consideration has been given to other appropriate security measures e.g. alarm systems, coded entry or swipe cards;
- the data subjects occupying the building have been notified of the proposed system/camera and given an opportunity to voice any concerns;
- careful consideration has been given to the security and management of the system within the School and externally if a contracted company is used.

6 Justification for the use of CCTV

The school is obliged under the GDPR, to ensure that data collected by CCTV systems is adequate, relevant, not excessive and only used for the purposes for which the data was collected. As per the General Data Protection Regulations, the school is able to justify the installation of CCTV systems and cameras on our premises. The justifiable reason for installation does indeed outweigh any consideration given to other less intrusive methods of managing any ongoing issue.

7 Location of CCTV Cameras

The school has endeavoured to select locations internally which are least intrusive to the data subjects occupying the building. The installation of CCTV cameras in areas where individuals would have a reasonable expectation of privacy have also been considered e.g. CCTV camera have not been installed in changing facilities, toilets etc.

CCTV systems will not normally be used to monitor day-to-day staff/student classroom activity.

External cameras have been positioned in such a way as to prevent or minimise the recording of passers-by or the privacy rights of neighbouring private properties. The CCTV cameras will only capture images within the perimeter of the school premises.

8 Covert Surveillance

The school will not engage in covert surveillance of data subjects. Data subjects will be informed at all times through policies, privacy notices and signage on the sound legal basis for the CCTV monitoring.

Where An Garda Síochána requests to carry out covert surveillance on the school premises, such covert surveillance may require the consent of a Judge. Accordingly, any such request should be made in writing and the school will seek legal advice where necessary.

9 Notification and Signage

The Principal will provide a copy of CCTV Policy and CCTV Privacy Notice on request to staff, students, parents and visitors to the school premises. The CCTV Policy and CCTV Privacy Notice describes the purpose of the CCTV monitoring, the rights of the Data Subject with regard to the monitoring, and contact details for those wishing to access more information.

Signage shall be placed internally in each premises near to where CCTV cameras are sited to inform data subjects that CCTV is in operation in that area. More extensive external signage shall also be prominently displayed on entrance to the school property. This signage shall include a statement that CCTV is in operation as well as a contact (such as a phone number) for persons wishing to discuss this processing, the specific purpose for the CCTV should also be displayed.

Appropriate locations for signage will include:

- Entrances to premises e.g. external doors, walls and school gates or any highly visible appropriate area;
- Reception area;
- Close to each internal camera;

10 Management, Control and Access

The CCTV system is located in the Principal's office - a secure room where monitoring screens and recorded footage is securely held.

- The office is locked when not occupied by authorised personnel;
- Unauthorised access to the monitoring screens or footage is not permitted;
- An 'Access log' should be maintained by authorised persons for the security of the system and any footage held;

In relevant circumstances, CCTV footage may be shared with certain other bodies/agencies where the school is required to do so.

Under the GDPR, the school - as part of a valid Data Access Request, is obliged to provide data subjects with a copy of their personal data on request. If the requested data are CCTV recordings, the school reserves the right to release this either (a) in soft copy footage, or (b) in still images (photos) at a rate of one photograph per second of video.

If the CCTV footage includes images of other people, their images will be pixilated or otherwise blanked out. Data Access Requests for CCTV footage should be notified immediately to the Principal who will examine the content of the request, and advise on any further steps e.g. the requirement for pixilation of the footage.

11 Requests by An Garda Síochána:

Information obtained through video monitoring may only be released when authorised by the Principal, following consultation with the Board of Management.

If An Garda Síochána request CCTV images for a specific investigation, An Garda Síochána may require a warrant and accordingly any such request made by An Garda Síochána should be made in writing and the school will immediately seek legal advice.

There is a distinction between a request by An Garda Síochána to view CCTV footage and to obtain/download copies of CCTV footage. In general, An Garda Síochána making a request to simply view footage on the premises would not raise any specific concerns from a data protection perspective.

12 Retention of Recordings

The retention period for CCTV footage is 28 days. Footage will not be retained by the school for longer than 28 days, unless it is required as part of an ongoing investigation or Data Access Request.

13 Security Companies

Security companies that install and service cameras on behalf of the school are considered to be "Data Processors". As data processors, they operate under the instruction of data controllers (their clients).

The school is required to have a Data Processing Agreement in place with any CCTV security company contracted to manage the CCTV systems in place in the school.

This agreement details the areas to be monitored, how long data is to be stored, what the security company may do with the data; what security standards should be in place and what verification procedures may apply.

The written contract also states that the security company will give the school all reasonable assistance to deal with any data access request made under the GDPR which may be received by the school within the statutory time-frame (generally one month).

Under GDPR, Contracted CCTV companies, as data processors, are required to have appropriate security measures in place to prevent the unauthorised access, alteration, disclosure, or destruction of the data, and secure technical measures in place to protect against any unlawful forms of processing. Employees of the CCTV security company must be made aware of their data protection obligations when processing the data.

WARNING CCTV CAMERAS IN OPERATION 24/7

CCTV is used proportionately in accordance with the GDPR for the purpose of crime-prevention, the prevention of anti-social behaviour, the prevention of bullying, for the safety of our staff and students and for the protection of personal and school property.

This system will be operated 24-hours a day, every day.

These images may be passed to An Garda Síochána in certain circumstances.

This system is controlled by Senior Management at Ballinrobe Community School.

For more information, contact the Principal on 094 954 1777.
